

Technology experts will provide information and discussion on: State Program, HP Design & Process Overview, Lighting/Lighting Controls, HVAC, Roofing, and Commissioning.

“A high performance school will significantly reduce energy consumption in a building. These energy savings will become greater as energy costs continue to escalate.”—Ken Seibert, PE

CMTA Consulting Engineering

Rebuild America/ Energy Smart Schools

High Performance School Design

FREE One-day event for School Administrators, facility managers,

school board members; engineers, architects, city & county officials and others interested in energy-efficient technologies.*

*Includes Continental breakfast and lunch.

Discover how the latest energy-saving technologies in buildings can save you money!

“The re-analysis study found that elementary school students in classrooms with the most daylight showed a **21 percent improvement in learning rates** compared to students in classrooms with the least daylight. This is highly consistent with the range of findings in the original study.”

*2002 Re-analysis of 1999 study of Daylighting in School by Heschong-Mahone

Basic High Performance Design Schools Seminars

August 17, 2004 - Knoxville

August 19, 2004 - Franklin

August 20, 2004 - Jackson

Attendance at this workshop qualifies for AIA learning units in the Health, Safety, and Welfare category.
